Description

REGENERATE Enamel Science™ is the first oral care system with NR-5™ able to regenerate tooth enamel mineral¹, reversing the early enamel erosion process, keeping teeth healthy and strong. 80% of common tooth problems, such as sensitivity, transparency and yellowing, are caused by enamel erosion and acid attacks. REGENERATE™ Advanced Toothpaste regenerates enamel mineral¹ and helps to restore natural whiteness while strengthening teeth against cavities.

REGENERATE Enamel Science™ toothpaste is powered by an exclusive and clinically proven NR-5™ technology; the NR-5™ ingredients combine to form a fresh supply of tooth enamel mineral which wrap and integrate onto teeth. Thanks to its unique formulation, the REGENERATE Enamel Science™ toothpaste has distinctive product characteristics: a dense formula with a rich texture due to the high content of ingredients and a fresh mint sensation.

Ingredients: *Glycerin, Calcium Silicate, PEG-8, Hydrated Silica, Trisodium Phosphate, Sodium Phosphate, Aqua, PE-60, Sodium Lauryl Sulfate, Sodium Monofluorophosphate, AromaFlavour, Synthetic Fluorophlogopite, Sodium Saccharin, Polyacrylic Acid, Tin Oxide, Limonene, C177891*

¹Acts on early invisible stages of enamel erosion by restoring its mineral content and micro hardness with regular use. Clinically proven.

How To Use

Use REGENERATE Enamel Science™ Advanced Toothpaste twice daily, in place of your regular toothpaste. Use with REGENERATE™ Advanced Enamel Serum to boost effectiveness by 43%². REGENERATE Enamel Science™ toothpaste starts working immediately, from the first use.

²As demonstrated in a 3 day in vitro test measuring enamel micro hardness: Combined use of toothpaste and serum vs. toothpaste only.

How It Works

Nine years of research went into developing the Advanced Toothpaste. REGENERATE Enamel Science™ is powered by exclusive NR-5™ technology which unites Calcium Silicate and Sodium Phosphate these combine to form a crystal structure that is identical to Hydroxyapatite, the key mineral in dental enamel to integrate into teeth and regenerate enamel mineral¹.

REGENERATE Enamel Science™ Advanced Toothpaste is so effective that scientists had to develop a new water-free formula to prevent NR-5™ ingredients from reacting & unleashing their regenerative power in the tube.

¹Acts on early invisible stages of enamel erosion by restoring its mineral content and micro hardness with regular use. Clinically proven

REGENERATE Enamel Science™ Regime

REGENERATE Enamel Science™ Regime

The REGENERATE Enamel Science™ range fits effortlessly into your daily routine. The enamel mineral regenerating Advanced Toothpaste and Foaming Mouthwash can be used as daily dental care while the REGENERATE Enamel Science™ Advanced Serum is a monthly ritual. Combined use of the toothpaste and serum can regenerate 82% of enamel after 3 days¹.

¹Based on an in vitro test measuring enamel surface microhardness after 3 days' combined use of Advanced Toothpaste and Advanced Enamel Serum.

This product is amazing and so much better than I expected, it's the best toothpaste I've tried and does exactly what it says on the tube.

It left my mouth feeling extra clean and fresh and my teeth felt a lot stronger after only using for a few days.

I could see the difference in the whiteness of my teeth after the first use of this produ...[Read More](#)

ct, so after a week of using there was a massive difference.

I will definitely be using this product in future and have already bought some more.

I highly recommend this product and would say it is the best on the market. [Read Less](#)

Although it's a good toothpaste, I would say that it does same job as other known brands.

Very easy to use, not a bad taste but there's really no change since my first use.

For that reason I would say that I do recommend it, it's not bad, but for the price, I would expect to more than just what others do.

Still a good toothpaste tho...[Read More](#)

Sparkling strong white teeth

Love it!! My teeth have got their gleam back!!! It tastes great too!

I have been using Regenerate advanced toothpaste for a few weeks now and I am very impressed with it. It tastes really minty and leaves my mouth feeling clean and fresh. I suffer with sensitive teeth and generally use a toothpaste for this but I was pleasantly surprised by how much of a difference this makes. Combined with the advanced foaming mou...[Read More](#)

thwash my mouth feels so much better than before. Highly recommend. [Read Less](#)

The toothpaste is different lighter texture to your average toothpaste. I have use this twice daily instead of the off the shelf toothpaste. My teeth feel clean and with a refreshing light mint flavour. The flavour does not leave and overpowering taste in my mouth.
